

16. Camera according to claim 1, characterized by the fact that the image information can be recorded as a black-and-white image and by means of the light-signal-creating media at least two white light signals of differing brightness can be created.

17. Camera according to claim 1, characterized by the fact that the light-signal-creating media include light-emitting diodes, incandescent lamps, laser diodes, fluorescent diodes, luminance diodes, glow lamps, or other light media.

18. Camera according to claim 1, characterized by the fact that the light-signal-creating media have one or more chromaticity and/or intensity filters positioned between the lighting medium and the recording medium.

REMARKS:

The claims in the application are 1-21.

Favorable consideration of the application as amended is respectfully requested.

The claims have been amended to eliminate all multiple dependencies (a marked-up copy is enclosed). The specification has been amended to insert subtitles.

Early favorable action is earnestly solicited.

Respectfully submitted,

George M. Kaplan
